The Change

Rajm University Series

In an epoch when environmental issues make the headlines, this is a work that goes beyond the everyday. Ecologies as diverse as the Himalayas and the Indian Ocean coast, the Négev desert and the former military bases of Vietnam, or the Namib desert and the eastern African savannah all have in common a long-time human presence and the many ways people have modified nature. With research covering countries from Asia, Africa, and Australia, the authors come together to ask how and why human impacts on nature have grown in scale and pace from a long pre-history. The chapters in this volume illuminate specific patterns and responses across time, going beyond an overt centring of the European experience. The tapestry of life and the human reshaping of environments evoke both concern and hope, making it vital to understand when, why, and how we came to this particular turn in the road. Eschewing easy labels and questioning eurocentrism in today’s climate vocabulary, this is a volume that will stimulate rethinking among scholars and citizens alike.

The Thakalis, Bon DKar, and Lamast Monasteries Along the Kali Gandaki, the Ancient Salt Route in Western Nepal

Comprehensive political history and ethnic composition of Bhutan.

Recent Nepal

This book is a detailed account of how hierarchy has been maintained historically by the Nepali state, affirming the uniqueness of a caste-based social order by bringing outsiders, especially ethnic groups and religious minorities, into the caste fold. Focusing on the contemporary state of Dalits, the community that was and is put at the bottom of a very hierarchial social order in Nepal, the author argues that the traditional caste-based social order is still prevalent in the “new” Nepal even after the recent socio-political and constitutional changes. Illustrated by scientifically employed and interpreted data mainly in the three sectors of education, politics and employment, the book postulates that people who were and are born into the “lower caste” still have more access to the resources and opportunities available in society in comparison with those born into the “lower” caste. It further argues that although reservation policies are in place to address social exclusion, these could not bring expected outcomes mainly due to the lack of engagement, if not ignorance, of both dominant groups and the community in the margin. The absence of clarity among political actors on the positive discrimination and affirmative actions has contributed to backtracking the recently created space in line with “inclusive Nepal”.

The Yeti

Bhutan

“Essential for both the traveller and scholar alike, Nepal fills a long dormant gap in the literature of this spectacular region and is a product of many years of individual research by scholars of Nepal’s history, religion, and sociology. It draws on a variety of authoritative studies of Nepal’s cultural history that have been published in European and Nepalese languages.” The guide begins with an overview of the history of Nepal. This focuses on the Kathmandu Valley, with its rich and sophisticated culture, but also outlines developments of historical importance outside the Valley. This is followed by a detailed introduction to religion as it is practised in Nepal: here, the focus is on Hinduism and Buddhism, and on the major deities of each tradition, their relationships to one another, and their representation in art and sculpture. “Although written mainly by academics, the book is intended for a general readership. Easily portable in format, Nepal does not tell the reader where to stay, what to eat or what to wear. It will though help those who wish to appreciate the cultural splendours of Nepal in their historical and religious context and require more information than is imparted by the average tourist guidebook.” - Book Jacket; Title Summary field provided by Blackwell North America, Inc. The Rulings of the Night

By studying these texts within and examining the styles of the manuscript illuminations, Amy Heller was able to shed light on the lost history of this remote Tibetan enclave, the spread of Buddhism in the Himalayas and its artistic legacy. The manuscripts, sculptures and mural paintings discovered in Dolpo are the concrete expression of the complex economic, political, artistic and religious interactions between the people of Dolpo and their neighbors in India, Nepal and Tibet. --

At Nature’s Edge

"This book offers a brief survey of the history of Nepal recalling why, leaving aside the Kathmandu valley, the sum of knowledge on its material culture lacks the objective distance allowed by other non-European civilizations: the country, long closed to Western visitors, opened but recently, and documents prior to the 1960s are scarce." "Bertrand Goy’s research into the archives leads us on the tracks of its statuary, while the ethnologist Gisèle Krauskopf shares with us a line of thought supported by her field experience and her knowledge of Nepalese culture. The testimony of a photographer traveller who visited Nepal in the pioneering days completes this volume with Hugues Dubois’ photographs of the masks and statuettes collected over the past twenty years by Max Itzikovitz." --Book jacket.
